Inclement weather causes scarcity of fish

by Charumini De Silva

A new package offering consultation and a series of diagnostic tests has been launched by the Ceylinco Diabetes Centre to promote screening for diabetes as a disease management strategy. The package which requires a visitor to present at the centre at No 40 9th Street Colombo 2, allows health conscious individuals to establish whether they are at risk of being affected by diabetes, and also receive expert guidance on how to avoid or delay the onset of the disease, the centre said.

The first half hour of each visit would be spent with a doctor and the second half for tests such as Fasting Blood Sugar (FBS), Lipid Profile, SGPT (Liver enzyme test) and Urine Full Report (UFR). The test results, along with additional doctor’s advice and measures would be made available in the evening of the same day.
